EDUCATION

Zetech University
Diploma in Software Engineering
2023-2024

Degree in Software Engineering
2025-2027 (Ongoing)

Moringa School
Data Science
FEBRUARY TO AUGUST 2025

SKILLS

- Creativity
- Critical Thinking
- Data Cleaning
- Data Visualization
- Machine Learning

LANGUAGES

English

Kiswahili

ABOUT ME

I am a passionate software engineer with three years of experience in the tech industry. My journey in technology began in 2023, and since then, I have developed a strong interest in Artificial Intelligence (AI) and Machine Learning. I have a foundation in programming languages such as HTML, CSS, and PHP, but I have chosen to specialize in Python to deepen my expertise in AI-driven applications.

Beyond software development, I am also familiar with Cisco's Networking, which has enhanced my understanding of network infrastructure and security. I am always eager to learn, innovate, and contribute to projects that drive technological advancements.

EXPERIENCE

2023

Paid Attachment

KENAS

- Troubleshot hardware and software issues, providing timely support to end-users.
- Assisted in user onboarding by offering training and guidance on newly installed systems.
- Participated in the monitoring, setup, and preventive maintenance of ICT equipment.
- Helped maintain an accurate inventory of ICT assets and software licenses.
- Supported the coordination and installation of new ICT infrastructure, including:
- CCTV systems
- Access control systems
- PABX telephony
- Wireless access points
- Network cabling and infrastructure
- Documented technical processes and maintained up-to-date records for all ICT equipment and systems.
